Essence of TESA

Medium Density Fibre Board (MDF)

Particle Board (PB)

The 1st 8-Cylindred Press ensures perfect pressing of the MAT edge to edge having a maximum platen size of 16ft (4880mm) x 4ft (1220mm). The press is simultaneously closing ensuring perfectly cured panels in every press.

A 18 - Day light press with built-in to optimally calibrate density & thickness through the Position Control System. The Press has a closing time of under a phenomenal 10 Seconds ensuring that the panels are optimally cured with the best surface finish.

The highest specific pressure in excess of 4.5Mpa ensuring a very high density map across the thicknesses resulting into MDF / HDF / Router Grade with an uniform high density.

The latest Air Grading System that ensures that the Fibers are not lumped together. Allows homogeneous fiber to sifted through weeding away any foreign particle. Ensures the integrity of the MAT resulting into an uniform MDF with high core homogeneity.

The state of the art glue kitchen capable of formulating glue with significantly low formaldehyde foot print, meeting E1 & E0 norms are easily achievable.

The unique SPIRAL Glue Line with multiple spray heads ensure that the fibres/particles are optimally & uniformly glued from all sides ensuring the highest internal bonding with in the core, resulting in better strength and durability of the end product.

Plant is equipped with a Double Cooling Turner System ensuring quick & better cooling. Allows faster curing of the raw panels which lends higher physical & mechanical properties with a perfectly formed surface for a ultra smooth finish.

The latest 10 - Head Sanding System for the 1st time in India with specially designed Polishing Rollers & Pads fitted at an incline resulting into ULTRA SMOOTH POLISHED Surface with Zero Bubble Surface.

Ensures flaking of Wood Chips with uniform Chip Dimension.

Chip Dryer ensures Optimally dried Wood Chips - **TOP TO CORE**.

Ensures Uniform Grading of Chips for Face & Core.

12 Day light Multi-Opening Press - 12 Boards in a single press Simultaneous Closing ensures uniform pressure & temperature.

The unique 6 cylindred press ensures perfect pressure & temperature uniformly across the length & breadth of every mats.

The 1st 8 head Sanding System in the Country. Ensures an Ultra - Smooth Surface ideal for Cold & Hot forming Paint & Polish Ready Surface ideal for Lamination in Short Cycle Press & also pasting.

With a perfect surface finish due to the 8-head sander the panel is precisely calibrated for thickness.

The 1st Short Cycle Press with 12 cylinders in the Country. Ensures perfect edge to edge lamination without any change of delamination or lamination defect.

Due to compact higher compression & the uniform flake layout in the core ensures a high screw holding strength in the core.

Panel has a 8ft x 6ft or 9ft size hence all size variants can be cut out from the primary panel with negligible wastage or loss.
